

Mohammad Arsalan (MERN Full Stack Developer)

+91 8766584560 | mohdarsalan391@gmail.com | Bargaon, Nagpur- 440013

Skills

Technical Skills: JavaScript (ES6+), Python, HTML5, CSS3

Front-end: React.js, TailwindCSS, Bootstrap, Redux, Redux Toolkit

Back-end & APIs: Node.js, Express.js, RESTful APIs, JWT Authentication

Database: MongoDB, MySQL

DevOps: Git, GitHub, Visual Studio Code, CI/CD

Others: Machine Learning (Python), Responsive Design, Agile, Cloud (AWS, GCP)

Projects

JOBIT (Job Portal) | Full Stack Project

Tech Stack: MERN Stack, React.js, Express.js, Node.js, MongoDB, JWT Authentication, Shadcn

- Developed a full-stack job portal using the MERN stack (MongoDB, Express.js, React.js, Node.js) enabling seamless interaction between job seekers and employers.
- Built features like user authentication, resume upload, and custom job search filters with keyword, location, and skill-based matching.
- Implemented secure APIs and JWT authentication to safeguard data, and used MongoDB for dynamic storage of user profiles, job listings, and applications.
- Created a responsive, mobile-first design using React.js and TailwindCSS, ensuring cross-browser compatibility, user-friendly interface in React, ensuring smooth functionality across devices, with scalable backend powered by Node.js and Express.
- Deployed scalable backend services with Node.js and Express.js, integrated with MongoDB for dynamic data storage.

UBER CLONE | Full Stack Project

Tech Stack: MERN Stack, Socket.io, Google Maps API, JWT Authentication

- Engineered a comprehensive ride-sharing platform with distinct user roles (drivers/riders) and real time tracking.
- Implemented Socket.io WebSockets enabling real-time communication between riders and drivers with <2s latency.
- Integrated Google Maps API for route optimization, distance calculation, and live location tracking.
- Developed secure API endpoints with JWT authentication, rate limiting, and input validation.
- Created responsive mobile-first UI with Tailwind CSS and GSAP animations, supporting all major browsers.

LEARNING MANAGEMENT SYSTEM | Full Stack Project

Tech Stack: MERN Stack, React.js, Node.js, Express, MongoDB, Cloudinary, Redux

- Developed a scalable LMS supporting 500+ concurrent users with comprehensive course management functionality.
 - Implemented role-based access control with granular permissions for students, instructors, and administrators.
 - Built file management system with Cloudinary integration handling 100MB+ file uploads with progress tracking.
 - Created interactive dashboard displaying key metrics and analytics for course engagement and completion rates.
 - Engineered notification system for assignment deadlines, feedback, and course announcements.
-

Certifications

MERN Fullstack Training and internship | Nass Technologies (2023 - 2024)

Machine Learning with Python | Verzeo (2023)

Education

Bachelors of Engineering (Computer Science) | 2023
